**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-19, 24-39, 46, 48, and 50 (renumbered 1-38) are allowed. The following is an examiner's statement of reasons for allowance:

Arredondo, which is seen to constitute the closest prior art of record, is directed to a lightweight bicycle tire construction formed by the following method: (a) providing an inflatable (expandable) mandrel having a rim portion, a spoke portion, and a hub portion, (b) wrapping a number of fabric layers having a plastic material matrix around each of the portions noted above to form a layered tubular body, (c) placing the thus covered mandrel in a mold, (d) increasing the temperature of the mold to cure the plastic material while the mandrel is inflated/expanded (this step applies pressure to the layers and compresses them against the mold surface), and (e) removing the layered tubular body from the mold and the mandrel (Column 5, Lines 10-30). In this instance, Arredondo suggests that the fabric layers can be cut in any desired shape; however, the reference fails to suggest the inclusion of cuttings and/or extensions to provide a uniform covering over the mandrel. In particular, the language of Arredondo is seen to generally suggest a ply having varying dimensions (e.g. widths and lengths) as opposed to the claimed arrangement in which a specific method step is carried out to provide cuttings and/or extensions in at least one lateral edge of a given fabric ply.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
